Subject: RE: HQ OA ppt

Thanks for the suggestions Mike. It's funny—a couple of them were things I had in there and took out, but I can put them back in. Have a great weekend!

Jill,

I love the graphs for the OA. I think it looks good. A couple of thoughts. If you want to discuss, give me a call at home

Personal Privacy / Ex. 6

1.

Deliberative Process / Ex. 5

- Upwelling makes our waters even more vulnerable.
- Hatchery Impacts being seen in Northwest (economic value)
- Blue Ribbon Panel
- UW Center
- Mention Alaska starting to look at.

2.

Deliberative Process / Ex. 5

- Graphic of pteropod indicating important food source for other critters
- Is this the right place to mention narrative criteria?
- How about status of WA (brief mention worthwhile)
- Maybe to complex but the graph by Cheryl showing the saturation state and dissolution of pteropods along with gradient of off shore to on shore impacts.

- Projections are for waters to become more corrosive.
- 3. Timing of OR decision and process for how we will make a decision. Maybe one or two bullets or maybe better just state verbally so not on paper.
- 4. Slide 8: Did CBD just sue EPA again for not moving forward on listing?
- 5. Side 10: Also add Ecology/PNNL project.

Subject: HQ OA ppt

Hi Mike,

Can you take a look at this, please? I'll pretty it up, but can you just check for content? I'll of course elaborate much more as I talk, but wanted to do a quick intro to OA and then just capture the major bullet points on a few slides, which I'll elaborate on during the presentation. Please let me know if I've left out anything big. Thx.
